### Benefits - Smart Reasons to Switch to Clearfly SIP Trunks

- **Save Money** - Enjoy the cost savings of converging your local, long distance and broadband Internet services onto a single circuit with dynamic bandwidth allocation.
- **Save Time** - Dedicated and knowledgeable Clearfly technicians and customer support specialists assure rapid deployment.
- **Simplify** - Experience the efficiency of managing a single network connection, receiving one bill and engaging one point of contact for all your local, long distance, and broadband Internet needs.
- **Protect your Investment** - Preserve your existing capabilities via seamless integration to your Traditional PBX or your SIP IP PBX. Clearfly is Vendor Certified and Customer Tested on all major manufacturers' communication systems.
- **Grow Your Business** - When you grow, adding more SIP Trunks is easy, and happens in days, not weeks. SIP Trunks can be installed and turned up remotely so you do not have to slow down.
- **Assurance** - Clearfly offers a 30 day penalty free cancellation because we are confident in our service.

### Survivability and Security – Piece of Mind for Your Business

- **Unavailable Call Forward** - Enjoy knowing you will never miss that important call. Upon any type of outage all calls will be routed to an emergency number—AUTOMATICALLY. When service is reestablished calls will be rerouted back to your phone system—AUTOMATICALLY.
- **Disaster Attendant (Optional)** - Make sure calls get answered by the right person all the time even when service is interrupted. Much like the Unavailable Call Forward this service automatically reroutes calls when service is lost but this time the caller can choose who they want to speak to. (Press 1 for Sales, Press 2 for Service. Each selection will route to a different emergency number.)
- **International Toll Fraud Protection\*** - International Calling is automatically blocked unless requested. Even when it's enabled Clearfly sets a dollar limit per hour for Intl calls. If exceeded Clearfly immediately opens a service ticket and prevents additional Intl calls from being made until a discussion with the customer takes place. *\*Toll Restriction should also be enabled on your phone system by an authorized dealer.*
- **Specified Source IP Address** - Clearfly can provide the Static IP address that all SIP sessions will come from which allows proper firewall and phone system setup and minimizes "SIP Hacking and Security Issues".

**Enjoy The Benefits Of Clearfly SIP Technology Today!**
